## PROJECTS

---

Lift Simulation : Javascript, Html, CSS [Live GitHub](#)

- Have a page where you input the number of floors and lifts from the user
- An interactive UI is generated, where we have visual depictions of lifts and buttons on floors
- Upon clicking a particular button on the floor, a lift goes to that floor

Zen Notes: Javascript, Html, CSS [Live GitHub](#)

- User can create multiple notes by clicking on +(add) button.
- User can make text BOLD and UNDERLINE while taking notes.
- User can VIEW, UPDATE and DELETE notes.
- Color theme can be changed with the click of a Button.

Natours: Sass, Html [Live GitHub](#)

- A hotel booking website.
- Attractive modern design with animation
